

Good opening for the successful closing...

voivarber®

More than trade

Due to emerged market conditions our company—besides commercial and brand service activities - became capable to solve more complex work construction and main contracting (EPC) projects. Basis of our contracting group is more years experience, skilled and trained collaborators, our subcontractors background is appropriate and reliable.

We established partnership with more sub contractors in order to provide stable, confidential and quality service. Due to this partnership we are able to act independently in realisation of investment and EPC tasks. Our self-supplying is exposed to civil works, steel works, mechanical-, isolation- and painting works.

voivarber®

Our main strength is in the followings:

- Secured financial state, appropriate guarantees
- Reliable, efficient partnership
- Flexible administration, fast and effective problem resolving
- Excellent workmanship/experience
- Stable, reliable suppliers' background
- Complete, task-specific technical solutions
- Complete service (technical guidance, maintenance service, product delivery and project management)
- Complete product management (delivery, installation, commissioning, maintenance, amendment)
- High quality for both products and services
- Fulfill of individual requirements

Maincontracting experience of our colleagues (previous employment)

[2003 – 2004] MOL Plc. Danube Refinery Central gas Plant

Project realisation in EPC form.
Replacement of main compressors and main technological parts (heat-exchangers, pumps...)
Pipe reconstruction; steel struction modification; civil related tasks (basements...)

[2004 – 2005] MOL Plc. Hajdúszoboszló UGS

„Continious Plant Availability“ (FMB) tasks
Project realisation in EPC form.
New gas treatment line execution (civil, steel structure, piping, electrical and instrumentation)
Gas engine retrofit; new gas well piping / instrumentation; control system upgrade; electrical cables replacement

[2004 – 2005] MOL Plc. Kardoskút UGS

„Continious Plant Availability“ (FMB) tasks
Project realisation in EPC form.
Gas treatment line upgrade; glycol treatment upgrade; gas engine retrofit; new gas well piping / instrumentation; gathering line upgrade (new control valve installation)
Control system upgrade and electrical related tasks

[2003 – 2005] MOL Plc. Danube Refinery BEK-5 Naphta Desulfurization Unit

Project realisation in EPC form.
Main equipment tenders, contracting, expediting, project organisation

[2005 – 2006] MOL Plc. Zsana UGS – Capacity extension III.

Project realisation in EPC form.
Complete execution of 3pcs off well pipelines into the gathering line, together with the civil, electrical and insulation works.
Modification of substation (installation of additional cabinets of high voltage distribution section, installation of high voltage switchgears, cables works with cable trays, etc.)
Replacement of the plant main headpipe contained the procurement and installation of MOV's and other mechanical equipments
Modification of the existing steel structure suitable for the new pipelines
Refurbishment of the existing air compressor building
Modification and extension of the existing DCS system

[2006 – 2007] HUNGRANA Ltd. – 4 complete Plant construction

Project realisation in EPC form.
New fermentation plant,
New distillary plant
New fermentation tank farm,
New glutene filter and dryer plant
Engineering/procurement/construction
Complete civil, steel structure, piping, stainless steel piping, electric and instrumental related tasks

Our maincontracting references

[2008 – 2009] **MOL Plc. Zsana UGS – Capacity extension IV.**

Site management, project management

New pressure booster compressors installation (2pcs SIEMENS)
Complete new station piping
5 new gas wells piping / connection to the control system
DCS system replacement
New transformer units installation (120/20kV; 120/6kV; 20/04kV)
New compressor building; new workshop; new gas treatment lines;
new gas coolers; gathering lines reconstruction
System pressure increasing from 135bar to 185bar

[2012] **MOL Plc. Százhalombatta DUFI—MOL DF EIFFEL projects PB storage C3 store modify**

EPC

Complete engineering, pipework, electric and instrumental construction
Equipment supply
New piping with 10 electric control valve (MOVs) installation
Site electric and instrumental work
Honeywell DCS modification

[2016-2017] **KALL Ingradients Kft - Tiszapüspöki Food Industry Plant**

Volvarber—Petrol-Innotech consortium / Main contractor

820-830. Alcohol distillation Plant
905. pipe bridge - 1km long; civil, steel construction manufacturing and erection work and insulation of 11km pipe
710. Sugar Plant - Equipment installation for Eurodia
831. Daily Tank farm— tank manufacturing, erection and painting (5pcs 80m³, 1pce 300m³)
700-710. Sugar and Steam Plant—DEDERT technology erection, complete piping and insulation work (7km stainless steel and carbon steel piping) pipe work

[2017-2018] **VIRE SOL Kft - Visonta Wheat Process Plant**

Volvarber—Petrol-Innotech consortium / Main contractor

550-560. Alcohol distillation Plant
Complete civil works, steel structure manufacturing and erection (550t)
Stainless steel and carbon steel piping construction (7km) and insulation
Main equipment installation (PRAJ)
Complete electric and instrumentation construction
570-580. Daily Tank farm and 2500m³ tank— tank manufacturing, erection and painting (4pcs 80m³, 2pce 300m³, 1-1pce 20m³ and 3m³, 1pce 2500m³); small pipe bridge and truck filling steel structure
110. Silo Plant - complete civil works of the connecting underground tunnel

[2019-2021] - **NT Ltd. Kiskunfélegyháza Sunflower preparation and extraction Plant**

Volvarber—Petrol-Innotech consortium / Main contractor

Pressing Plant

Complete Design, Complete civil works, steel structure manufacturing and erection
Stainless steel and carbon steel piping construction and insulation
Equipment installation (EUROPE CROWN)
Complete electric and instrumentation construction

Extraction Plant

Complete Design Complete civil works, steel structure manufacturing and erection
Stainless steel and carbon steel piping construction and insulation
Equipment installation (EUROPE CROWN), Ex system installation
Complete electric and instrumentation construction
